Forecast for Saturday 26 Dec 2020

Weather: Cloud thickening through the day, with outbreaks of rain by the afternoon. These turning heavy and persistent in the evening, with some wet snow possible above 900m. Winds will also strengthen by the afternoon, with storm force winds likely over even moderate hills, and mobility becoming close to impossible across higher level ridges or summits. There will also be a severe wind chill.

Chance of cloud free mountain/hill tops above 600m: 60% in the morning with occasional cloud at 600m, becoming 20% or less by dusk.

Visibility: Any early spells of good visibility are likely to remain limited, with visibility becoming moderate in rain and poor or very poor at times at height.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Conditions will deteriorate through the day, becoming very poor by the afternoon. Severe gales, perhaps storm force winds above 700m, along with persistent and heavy rain and a significant wind chill are all expected.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
03:00 on Sat 26 Dec 2020	3mm	3.2mm	6.2mm

Forecast for Sunday 27 Dec 2020

Weather: Heavy rain after midnight, turning squally for a time, before clearing by dawn. Winds easing, however freezing level falling, with snow possible down to 200m. Bright spells and snow showers during daylight hours, although perhaps falling as rain or sleet to lower levels. Temporary blizzard conditions possible over the summits. Widespread freeze likely overnight, with icy patches.

Maximum wind: West 50mph, gusting 65-75mph, but soon easing to 30 mph gusts 40-50mph.

Chance of cloud free mountain/hill tops above 600m: 40%, with occasional cloud at 500m, mainly during snow showers.

Visibility: Mostly very good, but becoming poor or very poor in snow showers.

Temperature: **Valleys:** Plus 2 Celsius, falling to Minus 2 Celsius in the evening
At 600m: Minus 3 Celsius
Freezing level: Falling to 300m by dawn, then persisting at this level.
